

Protect Your Revenue and Intellectual Property

With the proliferation of video-capable smart devices and multi-network, content owners require evolving technology to maximize the monetization of content and manage content rights delivered across various types of devices and browsers.

Digital Rights Management (DRM) will continue to be an integral tool for content providers to safeguard their products from piracy and revenue streams, rising demand for content on-the-go poses challenges to offer speedy delivery, flexibility for new formats and platforms, and evolving business models.

SwiftDRM with Verimatrix & Irdeto

Verimatrix VCAS™ offers a field-proven and award winning multi-network DRM solution for IP, broadcast, and hybrid networks. Together with Verimatrix MultiRights™ which offers multi-DRM supporting PlayReady, Widevine and Chrome-based devices, and Primetime, it completely address the multi-platform challenges.

Irdeto Multi-Screen solution include a DRM and streaming agnostic, open platform solution for securing content for delivery over IP. It adds in support for ActiveCloak™ for PlayReady and Secure Key Exchange for your content to meet the demands of studios, operators, and consumers.

These tools readily served to support digital TV operators to address the new opportunities arising from the accelerating convergence of video delivery over a multitude of devices. They support various video and DRM formats while providing a harmonized cross-network entitlement management.

SwiftDRM Cloud-based Multi-DRM service

Conversant partners closely with top notch vendors to provide Cloud-based Multi-DRM solutions with SwiftDRM, for faster and easier deployment of the winning solution anywhere and anytime. It also saves the technical and time-consuming challenges of setting up the licensing and implementation both for live and video-on-demand content.

Most of all, it is designed to integrate seamlessly with SwiftMedia modules and suite of OTT solution. It is also available for iOS and Android tablets and smart phones, PC/MAC computing platforms, connected STBs and smart TVs to bring you all these advantages :

Designed and optimized for streaming service delivery

- Advanced key management, already proven in 500+ IPTV deployments
- Trusted technology facilitates content licensing process and time-to-market
- Flexible business models with license recycling
